

Christopher Santana

Full Stack Engineer - MS in Information Systems candidate

christopher.sant@outlook.com | chsantana.com | linkedin.com/in/chrisalesant | New York City

Summary

Senior Full Stack Engineer with 10+ years building interfaces and systems for high-traffic web products in fintech and regulated industries. Currently at StocksToTrade where I architect, ship, and maintain resilient systems, analytics tools and headless content publishing pipelines using AI, Node.js, Vue.js, and AWS serving 1M+ Monthly Unique Users.

Professional Experience

Senior Full Stack Engineer

Nov 2023 – Present | Austin, Texas - Remote

StocksToTrade 

- **Lead frontend development for the Timothy Sykes and StocksToTrade websites and web apps**, shaping the architecture behind high-traffic platforms that show real-time stock data and curated financial news relevant to each site.
- **Created the main real-time market data ingestion system for the quote pages**, built on WebSockets, Node.js, AWS, and NoSQL databases.
- **Designed and built the automated publishing pipeline for the stock news platform** serving **1M+ unique monthly users**, combining server-side rendering and static generation with a headless WordPress content workflow (including custom WordPress plugins for metadata, SEO, and generative content).
- **Leveraged AI to build QA automation tooling, bespoke ad-serving solutions, and automated comment moderation**, to save **\$150K+** annually in operational costs.
- **Own system design and architecture decisions across distributed, cross-functional teams**, partnering on PRDs and leading features end-to-end from prototyping through shipping; conduct code reviews and enforce best practices.
- **Perform SRE functions** — monitoring, load balancing, and deployment pipeline maintenance — plus lightweight data pipelines for SEO tracking, analytics reporting, and system debugging, and SEO integrity checks, to support reliability and data-driven decisions.

Founding Frontend Engineer - Contract

2025 – 2026 | Remote

Canopy Network 

- Owned frontend architecture end-to-end for a blockchain super app from zero to testnet launch using React Server Components, Next.js App Router, and Node.js — reaching **25,000+ concurrent users in launch week**.
- Designed and shipped the Launchpad, DEX trading module, and Chain Explorer flows in a high-autonomy, early-stage environment with full creative and architectural ownership.

Frontend Engineer - Contract

2024 | Santo Domingo, Dominican Republic

Pulseara 

- Architected frontend for features related to how doctors manage patient histories, prescriptions, consultations, and waitlists.
- Built longitudinal history-tracking flows for doctors and patients on an EHR platform, plus AI-powered analysis tooling for prescriptions and medical images to support clinical workflows.
- Maintained the product's Electron offline desktop app, then led its port to a responsive web app using React and GraphQL.

Frontend Engineer - contract/part-time

Nov 2020 – Oct 2023

StocksToTrade

- **Migrated WordPress websites to headless architecture** using Nuxt, Gridsome, TailwindCSS, GraphQL, and REST APIs — decoupling content from presentation to improve performance and deployment flexibility.
- **Built custom microsites for campaigns and product launches helping drive six- and seven-figure revenue** using modern frontend frameworks, enabling rapid, independent deployment of marketing and product initiatives.
- **Designed and implemented custom advertising solutions and ad-blocking mitigation strategies**, enabling sites to maintain ad revenue while respecting user preferences.

React Developer

Nov 2021 – Oct 2023 | San Francisco, California - Remote

BairesDev

- **Led the migration** of a micro frontend monorepo comprising 60+ services from React 16 to React 18, resolving legacy technical debt and establishing a modernized foundation for the broader engineering organization.
- **Directed the refactoring** of a core UI library from React 16 to a modern TypeScript and React 18 syntax, ensuring strict Section 508 accessibility compliance and fortifying codebase stability through comprehensive testing with Jest and React Testing Library.

- **Engineered and integrated** pivotal features for internal dashboards and e-commerce modules, collaborating across teams to expand platform capabilities and streamline internal business operations.
- **Architected and deployed** a Headless CMS solution using Builder.io [↗](#) for a startup client, owning the end-to-end lifecycle from design to deployment to empowering and training of content teams.

Lead Design Engineer

Sep 2019 – Oct 2021

Claro Dominicana

Santo Domingo, Dominican Republic

- Led UI engineering efforts of a major redesign for the main customers portal: from an aging skeuomorphic look to a responsive, sleek and fast new interface that is still used today.
- Collaborated in the integration of major user flows such as billing, account and service management.
- Created and maintained a React UI library based on the company's new visual language to enhance the interface and functionality of the User Portal and Online Store.

Frontend Engineer

Mar 2015 – Sep 2019

Atlantica Seguros | StateTrust Group

Santo Domingo, Dominican Republic

- Designed and implemented UI assets for wealth management and insurance apps, supporting business operations across 20+ countries
- Implemented customer communications channels using HTML and CSS for in-house and third-party tool integration.

Education

MS in Information Systems

Aug 2025 – Present | New York City, US

Baruch College

Awards

1st Place in Branding Design Contest

24 Nov 2017

Ministry of Foreign Affairs of Dominican Republic

Collaborated with two colleagues in a highly competitive contest involving Marketing and Art schools from universities across the Dominican Republic. All participants were challenged with creating a comprehensive branding package for the *Presidencia Pro Tempore of SICA 2018* representing the Dominican Republic alongside crafting cohesive branding materials, and strategic proposals for public relations and digital marketing.

The *Sistema de la Integración Centroamericana (SICA)* is an organization dedicated to promoting regional cooperation and integration among Central American nations. Our winning branding and strategy were officially adopted and used for over six months in SICA-related events and activities
